1. A copy of the Japanese reference noted on page 3 of the specification should be supplied.

2. Claims 13-19 are allowed.

3. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 13 is objected to because of the following informalities: "d modulated" should be --demodulated--. Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 6,229,660, hereinafter "Chung".

Chung shows a magnetic disk apparatus including a read gate generation unit (col. 5, ll. 1-5), a data demodulation unit 16, and a read gate optimization unit (col. 5, ll. 40-60).
